

# Optiv Cybersecurity Education eLearning Catalog

## Addressing Every Organization’s Need for Training and Awareness

It can be easy to turn to technology to defend against the latest threat vectors, but no product can solve for the human element. Optiv’s Cybersecurity Education eLearning catalog offers learning content targeted at the human behavior aspect of risk that could damage or disrupt your core business and that aligns with your organization’s culture and unique business objectives.

### Optiv Solutions

#### Just-In-Time Microlearning (40+ Courses)

Optiv’s SecurityBytes microlearning courses are designed to provide just-in-time training when an end user fails a simulated phishing campaign or anytime brief bursts of training are appropriate. These courses, only available with Optiv-hosted engagements, are comprised of 1-3 minutes of content followed by a three-question quiz.

#### General End-User Education (100+ Courses)

Optiv’s general end-user awareness training courses arm employees with the knowledge and skills needed to protect your organization and themselves. This collection offers a variety of course styles that explain common threats, encourage secure behaviors and resonate across diverse organizational cultures.

##### Styles

- Real-world scenarios
- Microlearning
- Learning games

##### Topics Include

- Social engineering
- Phishing and email security
- Data security and privacy
- Account security
- Malware
- Digital hygiene
- AI usage
- Shadow IT

#### Role-Based and Compliance Education (50+ Courses)

Optiv’s role-based awareness training aligns with common compliance-related training obligations and security concerns associated with specific responsibilities or positions within organizations.

##### Business Stakeholders

- Board of directors and executives
- Process improvement teams
- Marketing, human resources, finance

##### IT and Security

- Users with privileged access
- Threat and vulnerability management

##### Regulatory

- Data privacy
- Information protection
- Payment Card Industry

#### Developer Education (45+ Courses)

Optiv’s developer courses provide advanced, focused training on specific security concerns related to the development of applications, websites and APIs. This course library offers training specific to commonly used programming languages as well as language-agnostic topics.

##### OWASP

- Web, API and Mobile Top 10
- Proactive controls

##### Application Security

- Common threats and attacks
- Vulnerability prevention

##### Secure Coding

- .NET/Java/Python best practices
- Web 3.0

### How We Do It

With the evolving threat landscape, annual training driven by compliance requirements is no longer enough. Each employee is a component of your defensive posture, and Optiv Cybersecurity Education programs address areas of need while engaging users to embrace meaningful behavior change.

## Benefits of eLearning format for security awareness training

- 1 Flexibility and accessibility allow users to learn anytime, anywhere
- 2 Implementation is faster and more cost-effective than face-to-face facilitation
- 3 Interactivity, simulation and gamification increases engagement with content
- 4 Easier scalability and messaging consistency
- 5 Real-time feedback and assessment

### Customer Profile

Consulting industry,  
2,500 employees globally

### Desired Outcomes

- Security awareness training for new employees within first 30 days
- Bi-annual security awareness training for all employees
- Annual role-based training for users that handle data
- A library of training for users to self-enroll in for professional development
- Just-in-time training for employees that failed phishing campaigns

### Scope

Client was relying on instructors to deliver security awareness training during new hire onboarding, which led to inconsistent messaging. Client did not have internal team that could develop training for the entire employee base. When users failed phishing campaigns, they would land on a training page, but only spend a few seconds there. Stakeholders felt this wasn't effective enough to reinforce the secure behavior desired.

### Solution

Client licensed Optiv's Total Tier content for all employees, where employees were able to self-enroll in courses to further their understanding of basic security awareness practices and had access to cybersecurity training for business stakeholders and users with privileged access. The client also leveraged Optiv's New Hire Security Awareness course and customized courses for bi-annual security awareness training.

### Client Benefits

Client was able to use meaningful, consistent and engaging training content to reinforce security awareness within their organization and meet various compliance requirements. The consistent messaging during onboarding also led to a decrease in the phishing click rate of new employees during their first 90 days of employment.

## The Optiv Advantage

### Why Clients Choose Optiv

Optiv is the proven strategic partner for secure business transformation. We earn our clients' trust by providing data-driven, expert recommendations for their security programs. Working with the best cyber technology on the market provides Optiv with the insights to identify gaps and advise our clients on the best investments for their unique business challenges.
